

Name: Vishal Shashikant Salvi.

Class: SE Comps

Batch: C

UID: 2019230069

Experiment No 5

Aim:

To create a basic e-commerce website which uses Bootstrap for major styling and basic functioning of pages.

Theory:

What is Bootstrap?

Bootstrap is a powerful front-end framework for faster and easier web development. It includes HTML and CSS based design templates for creating common user interface components like forms, buttons, navigations, dropdowns, alerts, modals, tabs, accordions, carousels, tooltips, and so on.

What You Can Do with Bootstrap

There are lot more things you can do with Bootstrap.

- You can easily create responsive websites.
- You can quickly create multi-column layout with pre-defined classes.
- You can quickly create different types of form layouts.
- You can quickly create different variation of navigation bar.
- You can easily create components like accordions, modals, etc. without writing any JS code.
- You can easily create dynamic tabs to manage large amount of content.
- You can easily create tooltips and popovers to show hint text.
- You can easily create carousel or image slider to showcase your content.
- You can quickly create different types of alert boxes.

Advantages of Using Bootstrap

If you have had some experience with any front-end framework, you might be wondering what makes

Bootstrap so special. Here are some advantages why one should opt for Bootstrap framework:

- Save lots of time— You can save lots of time and efforts using the Bootstrap predefined design templates and classes and concentrate on other development work.
- Responsive features— Using Bootstrap you can easily create responsive websites that appear more appropriately on different devices and screen resolutions without any change in markup.
- Consistent design— All Bootstrap components share the same design templates and styles through a central library, so the design and layout of your web pages will be consistent.
- Easy to use— Bootstrap is very easy to use. Anybody with the basic working knowledge of HTML, CSS and JavaScript can start development with Bootstrap.
- Compatible with browsers— Bootstrap is created with modern web browsers in mind and it is compatible with all modern browsers such as Chrome, Firefox, Safari, Internet Explorer, etc.
- Open Source— And the best part is, it is completely free to download and use.

Bootstrap Example:

```
<div class="jumbotron text-center">  
  <h1>My First Bootstrap Page</h1>  
  <p>Resize this responsive page to see the effect!</p>  
</div>
```

```
<div class="container">  
  <div class="row">  
    <div class="col-sm-4">  
      <h3>Column 1</h3>  
      <p>Lorem ipsum dolor..</p>  
    </div>  
    <div class="col-sm-4">  
      <h3>Column 2</h3>  
      <p>Lorem ipsum dolor..</p>  
    </div>  
    <div class="col-sm-4">  
      <h3>Column 3</h3>  
      <p>Lorem ipsum dolor..</p>  
    </div>  
  </div>  
</div>
```

My First Bootstrap Page

Resize this responsive page to see the effect!

Column 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit...
Ut enim ad minim veniam, quis nostrud exercitation
ullamco laboris...

Column 2

Lorem ipsum dolor sit amet, consectetur adipiscing elit...
Ut enim ad minim veniam, quis nostrud exercitation
ullamco laboris...

Column 3

Lorem ipsum dolor sit amet, consectetur adipiscing elit...
Ut enim ad minim veniam, quis nostrud exercitation
ullamco laboris...

Code:

Index.html

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">

Conclusion:

With Bootstrap, you don't have to reinvent the wheel each time you want to create a new application or website. This front-end framework is packed with multiple features that help developers accomplish their goals without starting from scratch. Templates and themes are built to be responsive from the word go, eliminating the worry of having a site that is not interactive. This allows developers to concentrate on what's important, which is to build whatever it is that they have in mind. From this experiment we create E-commers website by using Bootstrap.
